8.2 Exposure controls**Personal protective equipment****General protective and hygienic measures**

The usual precautionary measures should be adhered to general rules for handling chemicals.

Wash hands during breaks and at the end of the work.

Do not eat, drink or smoke while working.

Avoid contact with the eyes and skin.

Do not inhale gases / fumes / aerosols.

Avoid close or long term contact with the skin.

Breathing equipment: Filter A/P2.**Protection of hands:**

Protective gloves.

Only use chemical-protective gloves with CE-labelling of category III.

Check protective gloves prior to each use for their proper condition.

The glove material has to be impermeable and resistant to the product/ the substance/ the preparation.

After use of gloves apply skin-cleaning agents and skin cosmetics.

Protective gloves should be replaced at first signs of wear.

Material of gloves

Nitrile rubber, NBR

Recommended thickness of the material: >0,5 mm

The selection of the suitable gloves does not only depend on the material, but also on further marks of quality and varies from manufacturer to manufacturer. As the product is a preparation of several substances, the resistance of the glove material can not be calculated in advance and has therefore to be checked prior to the application.

Penetration time of glove material

The exact break through time has to be found out by the manufacturer of the protective gloves and has to be observed.

As protection from splashes gloves made of the following materials are suitable: Nitrile rubber, NBR**Not suitable are gloves made of the following materials:**

Strong gloves

Leather gloves

Eye protection: Safety glasses**Body protection:** Protective work clothing.**Limitation and supervision of exposure into the environment**

Do not allow to enter drainage system, surface or ground water.

Do not allow to enter the ground/soil.

Prevent from spreading (e.g. by damming-in or oil barriers).
